Each row is one chromosome end, telomere at left (dark bar, not to scale); ▼ = allele's median core switch.
Labels: allele number, structure (telomere → centromere; home = own arm; PFnn = paralog family), Release 2 frequency, tier.

Colour = CHM13 v2.0 end each block resembles most (faded: not present in this figure)

Paralog families (outlined; shared hue):

PF01 4p,14p,15p,21p,22p
PF02 1p,5q,6q
PF03 11p,15q
PF04 3q,19p
PF05 Xp,Yp
PF06 Xq,Yq
